

Rabbit Polyclonal Antibody to Human Albumin

Catalog No.:	RP 046, RP 046-05
Intended Use:	This product is intended for qualitative immunohistochemistry with normal and neoplastic formalin-fixed, paraffin-embedded tissue sections, to be viewed by light microscopy. Clinical interpretation of staining results should be accompanied by histological studies with proper controls. Patients' clinical histories and other relevant diagnostic tests should be utilized by a qualified person (s) when evaluating and interpreting results.
Immunogen:	Purified human albumin.
Host:	Rabbit
Format:	Purified immunoglobulin fraction of rabbit antiserum against human albumin containing sodium azide as a preservative.
Titer/Working Dilution:	This antibody may be diluted to a titer of 1:50-1:100 in an ABC method. The final dilution should be determined by the user based upon the staining conditions employed.
Staining Protocol:	We suggest an incubation period of 30 minutes at room temperature. Optimal incubation conditions should be determined by the user based upon the fixation conditions and staining system employed. <u>Suitable for formalin fixed, paraffin embedded tissue sections.</u>
Specificity:	This antibody reacts with human albumin. This antibody is essentially free of other rabbit serum proteins. Specificity is determined by Ouchterlony Double Diffusion (ODD) and immunoelectrophoresis (IEP) versus human serum and human albumin.
Positive Control:	Liver
Cellular Localization:	Cytoplasmic
Storage:	Store at 2-8°C. Do not use beyond the expiration date stated on the label.

IVD: For In Vitro Diagnostic Use
