Antigen Retrieval System

Features

- Upto 5 cycles/ run with individual time and temperature settings.
- Real- time temperature and time monitoring.
- Minimum reagent evaporation and low reagent consumption.
- Uniform retrieval, even in over fixed tissues.
- Multiple retrieval buffers in a single run.
- IHC, ISH, and FISH suitability.
- Add on slides in-between the cycles.
- Temperature ranges from ambient to 115 °c.
- High throughput (96 slides in less than 30 minutes).
- Comes with 500ml 10X citrate buffer and 10X EDTA buffer.

HUMIDITY CHAMBER

Features

- Maintains humidity.
- Ensures flat platform.
- Ease to rinse.
- Multiple slide handling during staining.

The Mouse/Rabbit PolyVue Plus™
HRP/DAB Detection System

Features

- Two-step procedure : faster detection.
- Universal system for rabbit and mouse antibodies.
- Higher signal amplification : high sensitivity.
- Reduced background and non- specific staining.
- Quick turn around time : more slides in lesser time, sooner results.
- Compatible with wide range of samples - blood smears, cytosmears and cell preparations.
- Supports higher dilutions of antibodies.
- Cost- effective.

(Hydrophobic Barrier)

Features

- PAP pen is a special marking pen which is globally accepted and widely used.
- Ensures 100% hydrophobic barriers on the slides for your IHC needs.
- Designed to prevent wastage of valuable reagents.
- Ensures Antibody and detection systems within the target area.
- Can be used for immunostaining of paraffin sections, frozen sections and for fluorescent antibody methods.
